SUMMARY

Final-year AI/ML student with 3 internships across game development, NLP, and data analytics. Seeking full-time roles in ML engineering or data science where I can apply hands-on experience in deep learning, MLOps, and end-to-end pipeline development.

EDUCATION

Haldia Institute of Technology <i>B.Tech in Computer Science & Engineering (AI & ML) — CGPA: 7.79 / 10</i>	West Bengal, India 2022 – 2026
DAV Public School (CBSE) <i>Intermediate (Class XII) — 73.4%</i>	West Bengal, India 2022
DAV Public School (CBSE) <i>Matriculation (Class X) — 87%</i>	West Bengal, India 2020

EXPERIENCE

AI/ML and Game Developer Intern <i>Capsitech IT Services Pvt Ltd, Jodhpur</i>	Jul 2025 – May 2026
– Developed ML models, BERT-based NLP pipelines, and Unity 2D/3D game modules using Python, TensorFlow, Scikit-learn, C#, and Unity. – Implemented gameplay systems including player movement, enemy AI, and collision mechanics while optimizing asset loading and memory usage, reducing load times by 30%. – Built automated ML workflows with hyperparameter tuning, model evaluation, version control, and deployment practices to improve performance and development efficiency.	
Data Analyst Intern <i>Exide Industries, West Bengal</i>	Jul 2024 – Aug 2024
– Analyzed large-scale warranty datasets (50,000+ records) using SQL, Python (Pandas, NumPy), and Excel; delivered insights that contributed to 18% reduction in repeat claims. – Designed interactive Power BI and Excel dashboards for key metrics, reducing reporting time by 45%. – Designed and optimized 50+ chatbot intents with NLP preprocessing, improving intent recognition accuracy.	

PROJECTS

AI Cybersecurity Threat Detection Dashboard
– Built a real-time network threat detection system achieving 91%+ F1-score using ensemble anomaly detection models. – Developed FastAPI backend with React frontend featuring live monitoring and automated alerting system, reducing incident analysis time by 80%. – Implemented Redis Pub/Sub for high-throughput event streaming (10,000+ events/sec).
FoodBridge AI – Food Redistribution Platform
– Developed a full-stack platform connecting restaurants, NGOs, and volunteers; achieved 73% reduction in simulated food waste using XGBoost (92% precision). – Implemented demand forecasting with Prophet + LSTM and optimized delivery routes using OR-Tools, cutting delivery time by 38%. – Built 4 role-specific portals with real-time analytics, maps, and push notifications.

SKILLS

Programming Languages & Frameworks: Python, SQL, C#, TensorFlow, Keras, Scikit-learn, XGBoost, BERT, FastAPI, React, Pandas, NumPy

Machine Learning & AI: Deep Learning, NLP, Anomaly Detection, Classification Models, Demand Forecasting, Feature Engineering, Hyperparameter Tuning, MLOps

Tools & Platforms: Git, Docker, PostgreSQL, Redis, Celery, Unity, Power BI, Excel, CI/CD

CERTIFICATES

Artificial Intelligence Foundations

Introduction to Generative AI

Exide Data Analyst

AI/ML Intern
